

# 1<sup>st</sup> Meeting of the Italian and Spanish Crystallographic Associations (MISCA)

September 24-28, 2007

Hosted by the University of Calabria (Dipartimento di Chimica)

Venue: Villaggio Guglielmo Copanello di Stalettì (Italy)

Group of Crystallography and Crystal Growth  
Spanish Royal Societies of Physics and Chemistry

UNIVERSITÀ DELLA CALABRIA

Dipartimento di CHIMICA

## OVERVIEW

MISCA is thought as an important forum for the bilateral and interdisciplinary discussions of Italian and Spanish scientists interested in crystallography and crystal growth. The developments and frontiers in the investigation of structure and properties of crystalline materials will constitute the core of the scientific program. Focus will be given on:

- Theory and Methods in Crystallography
- Advanced Functional Properties of Crystal Engineered Molecular Structures
- Crystal Growth
- Synchrotron and Neutron Sources and Instrumentation
- Biocrystallography
- Electron Crystallography
- Molecular Interactions
- Computational Crystallography

| REGISTRATION FEES (in Euro)   | Before<br>01/06/2007 | Late &<br>on site |
|-------------------------------|----------------------|-------------------|
| Regular - AIC or GE3C members | 200                  | 230               |

## ACCOMODATIONS

MISCA will take place in the Guglielmo Village, a top class hotel resort on the ionic coast. All the facilities to host an international scientific congress are available, and the hotel offers all the amenities for a most pleasant staying. Beside a large private beach, it has swimming pools, three tennis courts, wireless Internet access and water sports.

Special low rates are reserved to students and young researchers. Soft and inexpensive lunches are also available at the congress venue.
